

Carbon Dioxide (CO₂) Fire Extinguisher

Overview

Our CO₂ fire extinguisher is designed for Class B fires and is safe to use on live electrical equipment up to 1000V. Built with a strong hose and high-pressure parts, it is durable and ready to perform in emergencies.

Its compact size and 2-meter discharge range make it easy to use, especially in small spaces. Made to the highest standards following EN 3-7 and approved by BSTI, this extinguisher is a trusted choice for home or business safety.

Proudly made in Bangladesh, it features a bright red RAL 3000 finish for a reliable and stylish look.
